5th Avenue sets M

Assembling and Installation Instruction

5th Avenue set M description

Spectacular and unique collection implemented in minimalistic and timeless shapes astonishing with widest range of different uses, application areas and architectural settings.

5th Avenue is suitable for most stringent requirements in terms of design and hygiene, a stunning hand-washing system for hotel and residential suites and public lavatories.

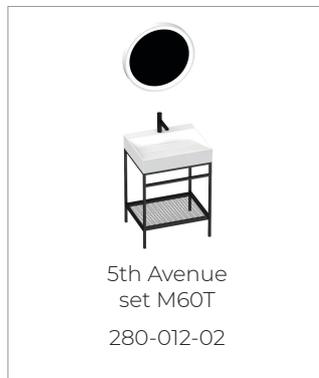

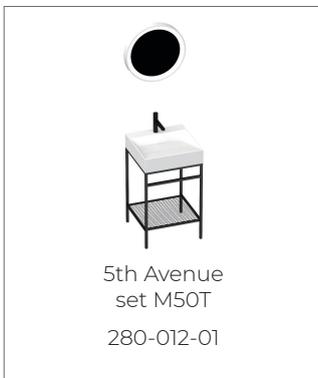

Perfect balance between practicality and pleasing aesthetics.

Follow the guidelines in this document to install the products correctly.

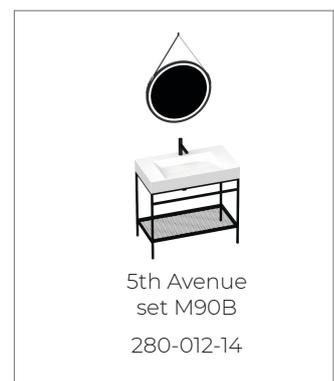

NB! Please note that some steps for installing and connecting the product can only be performed by authorized and specially trained qualified personnel!

Draw a sketch of where and how you want to install your set. Inspect the existing drain and supply tubing and replace if necessary. Make sure all the pipes (water supply, drain, electric supply) will be in the right place and height. Make sure that you can easily access later for servicing and maintenance!

Please read these instructions carefully before installation

1. When working at heights, please use a suitable platform to work from.
2. **Please note:** For new installations, check for any electrical cables or pipe work (gas/water) in the vicinity of the intended mounting points of the supports before proceeding with the installation.
3. To avoid the risk of electrocution, please turn off the electricity supply mains before commencing the installation. Close the water valves near to area where the washbasin will be installed.
4. Ensure that the mounting location can hold the weight of the complete product.
5. Wear suitable eyes protection when drilling.
6. Be carefull when using power tools near to the water.
7. Installation should be carried out by a qualified personnel only.
8. **DO NOT** use abrasive cleaning agents on any type of product surfaces.
